

The compact Model HB20 SideWinder is powerful enough to tackle stumps difficult to reach with other grinders, and offers a unique pivot-action base allowing the user to keep the wheel base stationary while using a smooth gliding motion back and forth to easily grind stumps.

The Model HB20 SideWinder is a must-have for those smaller stumps. Operators love its ease of operation and how it significantly reduces the effort required to grind a stump. It features a centre-pivot pin which is easy to release, the ability to lock the machine into place for convenient transit, and a compact design that is easy manoeuvre and maintain. Available with a 27HP Kohler petrol engine.
